- Production date of the KID: 11/05/2026

You are about to purchase a product that is not simple and may be difficult to understand.

1. WHAT IS THIS PRODUCT?

TYPE

An Over the Counter (OTC) derivative contract – Purchase of a Commodity Call Option

TERM

The product has a fixed contractually agreed term and will terminate after 1 year.

OBJECTIVES

Commodity Call Options are used for managing commodity price risks.

A Commodity Call Option is an agreement between two contracting parties (client/UniCredit Bank Hungary Zrt.) where you, as the buyer of the Commodity Call Option, have the right but not the obligation to buy the underlying commodity for a specific notional quantity at an agreed strike price on pre-determined future dates (fixing dates) during the contractually agreed term. If the floating price of the underlying commodity exceeds the agreed strike price on a fixing date, you will receive a compensation payment for the respective calculation period. The amount of such a compensation payment is calculated as difference between the floating price and the strike price, based on the notional quantity for the respective calculation period. The floating price can be determined as the reference price on the fixing dates or calculated as average of the reference prices for the respective calculation period.

When purchasing the Commodity Call Option you pay an option premium which is not refundable. The amount of the option premium depends among other things on the term of the option, the level of the strike price and the volatility of the reference price.

The notional quantity of the Purchase of a Commodity Call Option serves merely to calculate the respective payments. There is no physical delivery of the commodity underlying.

You can enter into this product also in a foreign currency.

Sample product terms are set out below and are based on legally predefined or realistic assumptions and may not match your specific contract details.

Underlying commodity	Aluminum High Grade
Term	1 year
Calculation period	1 month
Total notional quantity	12 metric tons
Notional quantity per calculation period	1 metric ton
Strike price	USD 3,250.00 / metric ton
Floating price	average of reference price on a daily basis, monthly payments
Option premium	USD 2,192.16

INTENDED RETAIL INVESTOR

This product is designed for retail investors who

(i) hold this product for the contractually agreed term,

(ii) understand that the option premium paid is not refundable and that they may receive nothing or less than the amount of the option premium and

(iii) have comprehensive knowledge of and/or past experience with OTC derivatives and the financial markets.

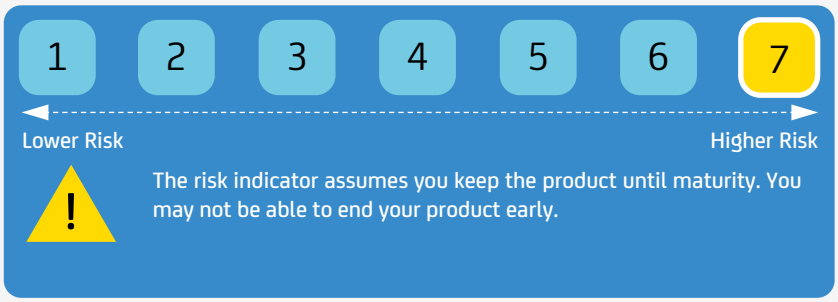
2. WHAT ARE THE RISKS AND WHAT COULD I GET IN RETURN?

RISK INDICATOR

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

We have classified this product as 7 out of 7, which is the highest risk class.

UniCredit Bank



Be aware of currency risk. You may pay and/or receive payments in a different currency, so the final return you will get depends on the exchange rate between the two currencies. This risk is not considered in the indicator shown above.

In some circumstances you may be required to make payments to pay for losses. **The total loss you may incur may be significant.**

This product does not include any protection from future market performance so you could incur significant losses.

If we are not able to pay you what is owed, you could incur significant losses.

PERFORMANCE SCENARIOS

What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted. The scenarios shown are illustrations based on results from the past and on certain assumptions. Markets could develop very differently in the future.

Recommended holding period:		**1 year**
Example total notional quantity:		**12 metric tons**
Scenarios		**If you end after 1 year**
Minimum scenario	There is no minimum guaranteed return. You could lose some or all of your premium.	
Stress scenario	What you might get back or pay after costs	USD -2,192
	Average return/loss over total notional quantity each year	-5.6%
Unfavourable scenario	What you might get back or pay after costs	USD -2,192
	Average return/loss over total notional quantity each year	-5.6%
Moderate scenario	What you might get back or pay after costs	USD -771
	Average return/loss over total notional quantity each year	-2.0%
Favourable scenario	What you might get back or pay after costs	USD 7,514
	Average return/loss over total notional quantity each year	19.3%

The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back or pay.

The favourable, moderate, unfavourable and stress scenarios represent possible outcomes, which have been calculated based on simulations using the past performance of the underlying commodity over the past 5 years. The stress scenario shows what you might get back or pay in extreme market circumstances.

This product cannot be easily cashed in. This means it is difficult to estimate how much you would get back if you cash in before the end of the recommended holding period. You will either be unable to cash in early or you will make a large loss if you do so.

3. WHAT HAPPENS IF UNICREDIT BANK HUNGARY ZRT. IS UNABLE TO PAY OUT?

Counterparties of derivative transactions are exposed to the risk that UniCredit Bank Hungary Zrt. becomes unable to discharge its obligations under the transaction, for example in the case of an insolvency (inability to pay or overindebtedness) or in the case resolution measures are taken by an authority against the credit institution. Such a decision to take resolution measures can, for example, be taken if the assets of the institution are less than its liabilities, where it is unable or will, in the near future, be unable to pay its debts or other liabilities as they fall due, or where it requires extraordinary public financial support. Where resolution measures are taken, the competent resolution authority can decide on an early termination of the derivative transaction. In the case such early termination results in a claim of the counterparty against the credit institution, the decision of the resolution authority can lead to a partial or complete reduction of the principal amount of this claim or in a conversion of this claim in to equity (shares or other types of equity).

If UniCredit Bank Hungary Zrt. does not fulfil its obligations connected with the product or is unable to pay, you can lose part of or the full payout or can suffer an unlimited loss. This product is not protected by any deposit guarantee scheme, legal or otherwise, or any other type of guarantee.

4. WHAT ARE THE COSTS?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

COSTS OVER TIME

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product and how well the product does. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- The product does not change in value (0% annual return).
- A total notional quantity of 12 metric tons

	If you end after 1 year (Recommended holding period)
Total costs	USD 878
Annual cost impact (*)	2.3%

(*) This illustrates how costs reduce your return in relation to total notional quantity each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 0.3% before costs and -2.0% after costs.

COMPOSITION OF COSTS

One-off costs upon entry or exit		If you end after 1 year
Entry costs	These costs are already included in the price you pay.	Up to USD 878
Exit costs	Not applicable	

5. HOW LONG SHOULD I HOLD IT AND CAN I TAKE MONEY OUT EARLY?

Recommended holding period: 1 year

The recommended holding period corresponds to the contractually agreed term. You are not entitled to unilaterally terminate the product prematurely. However, the right of early termination may be agreed for one or both contracting parties. In the event of an agreed early termination, you will either receive or pay a compensation payment, which is made up of the market value of the product and the termination costs, including a margin earned by the bank. Significant additional costs may be incurred.

6. HOW CAN I COMPLAIN?

You can make complaints about the product, or about the behaviour of the issuer of the product or of the persons that provide advice regarding or who sell the product, on the following website https://www.unicreditbank.hu, in writing to 1054 Budapest Szabadság tér 5-6. or via e-mail to treasurysales@unicreditgroup.hu.

7. OTHER RELEVANT INFORMATION
