

## Providing Account Information Service (AIS) consent with SpectraNet approval

**Step 1:** In the Account Information Service Provider interface (website or mobile application), specify which account and until when you want to provide access to account information (balance and / or account history data).

**Step 2:** To confirm the consent, the Account Information Service Provider page will redirect you to the UniCredit navigation page. For English text please scroll down and select "SpectraNet" there. (AIS consents cannot be approved in installed Spectra)

**Step 3:** On the "Identification" page, enter the user name and access code corresponding to the authentication method.

The image shows two screenshots of the UniCredit Bank 'Identification' page. The first screenshot shows the 'User Name' input field with a 'Go on' button. The second screenshot shows the 'Token code' input field with a 'Go on' button.

**Step 4:** Review the consent details on the "Consent" screen that appears after successful authentication. The parameters must be the same as those recorded on the service provider's side, they cannot be changed here. To confirm access to your account information, click the checkbox below and press "Accept".

The screenshot shows the UniCredit Bank 'Consent' page. It contains the following fields and information: TPP/Application (Unicredit SpA test PSP\_AI/), National Authority Code (BDI), Country Code (IT), Reference Number, Recurring (Yes), Valid until (2020.10.20. 02:00:00), Allowed accounts for account information inquiry (10900011-00000 5 HUF), Allowed accounts for balance inquiry (10900011-00000 5 HUF), and Allowed accounts for transaction inquiry (10900011-00000 5 HUF). At the bottom, there is a red box around the text 'I agree that the app will have access to my account information.' with a checked checkbox. Below this is an 'Accept' button.

**Step 5:** After the approval the page will then automatically redirect you to the service provider interface.

# Overview of account information consents in SpectraNet

In SpectraNet, you can view the previously given account information consents in the "INFORMATION / API Consents" menu. The consents cannot be changed here, in accordance with the provisions of the EU Payments Services Directive. If you wish to change or revoke any of your authorizations, you must do so at your account information service provider.

The screenshot displays the UniCredit Bank SpectraNet interface. At the top left is the UniCredit Bank logo. Below it are navigation tabs for 'ACCOUNTS' and 'SECURITIES'. A language selector at the top right shows 'MAGYAR', 'ENGLISH', and 'DEUTSCH'. On the left is a vertical navigation menu with categories: 'User', 'QUICK MENU', 'INFORMATION', 'ORDERS', 'HANDLING PATTERNS', and 'MESSAGES (0/0)'. The 'API consents' item is highlighted with a red box. The main content area is titled 'API CONSENT' and contains a form with the following fields:

User Identifier		Recurring	Yes
User Name		Valid until	2020.09.30. 02:00:00
TPPI/Application	Unicredit SpA test PSP_Atl	Combined service	Yes
National Authority Code		Id	81259ad7-884e-4810-bf72-24dc94d0a9e1
BDI		Status	Valid
Country Code	IT		

Below the form are three tables listing allowed accounts for different inquiry types:

Allowed accounts for account information inquiry		
Account Number	Currency	Account Name
10900011-0 5	HUF	FOLYÓSZÁMLA

Allowed accounts for balance inquiry		
Account Number	Currency	Account Name
10900011-0 3	HUF	FOLYÓSZÁMLA

Allowed accounts for transaction inquiry		
Account Number	Currency	Account Name
10900011-0 5	HUF	FOLYÓSZÁMLA

A 'Close' button is located at the bottom right of the main content area.
